## GUIDELINES FOR THE BURNING OF CHURCH ALTAR CANDLES

Candles should be stored horizontally on a flat surface. They should not be subjected to direct sunlight or extremes of temperature, and it is recommended that they are used within two years of purchase.

When setting up a new candle, ensure that it is firmly held in an upright position, and the holder is placed on a stable surface.

Before lighting a new candle, ensure the wick is not twisted and is standing upright, in line with the candle. The exposed wick should be trimmed, if necessary, to approximately 1/2".

A Charles Farris lighting taper should be used to light the candle, exposing the full wick to the taper flame. The use of matches or paper should be avoided, as they can drop extraneous material into the candle which can cause serious burning problems.

When relighting a candle, ensure the burning pool is clear of any foreign materials, and take care not to move the wick from its previous burning shape.

If a candle is burning with an abnormally low flame, extinguish it and when the wax has cooled pare down the top of the candle until sufficient wick is exposed.

To extinguish a candle do not blow directly onto the molten wax pool, or wax may splash out. A candle snuffer should be used but take care not to damage the wick or the lip of the wax pool.

Excessive draughts will cause some candles to gutter, and in many environments these draughts are unavoidable.

To control guttering in these circumstances, Charles Farris market a range of candle caps. These are available for specific candle types and sizes. Charles Farris, or their representative, should be contacted directly if candle caps are required.

Hot water should be used to remove wax from metal, glass or ceramic holders.

If candles are burnt in confined spaces, there should be at least two feet vertical clearance between the flame and any surface or material.

**EXTREME CARE MUST BE TAKEN AT ALL TIMES TO ENSURE THAT CANDLES ARE BURNT CORRECTLY AND IN SAFE SURROUNDINGS.**

**NEVER LEAVE BURNING CANDLES UNSUPERVISED.**

## GUIDELINES FOR BURNING PASCHAL & LARGER CANDLES

The larger the diameter of a candle the more difficult the relationship between wick and wax.

In order not to leave a wall of wax around the edge of the candle the wick size should be large to create enough heat to melt out to the edge of the candle. The risks in doing this are twofold:

The wax will melt but not be burned quickly enough, resulting in the wax running down the candle and onto the altar or table.

The excess of unburned wax being sucked up the wick will result in the candle being smoky.

Both are unacceptable.

To resolve these a thinner wick is introduced. However, this creates a further problem; the heat is insufficient to melt the wax, leaving a wall of wax at the edge of the candle. This is ideal if the wall is thin. The wall can, and should, be removed after the candle has been extinguished and the wax pool has set, but when the wall is still warm. This should then be trimmed with a sharp knife leaving approximately a 1/4" high wall for the next lighting. However, if the church is cold or draughty this leaves a wall which is too thick.

Neither wick options are perfect for all occasions so manufacturers compromise and use a medium wick to avoid most of the problems. This leaves some circumstances when any of the above can occur. Historically, candlemakers used 'Winter' and 'Summer' wicks to aid the burning, this of course was when churches burned candles for many more hours a day.

Lastly, large candles, 2" and over, should be burned for a minimum of one hour at a time to allow the wax to melt to its optimum and the candle to perform as designed. Short burning time results in wall build up and wastage.

**EXTREME CARE MUST BE TAKEN AT ALL TIMES TO ENSURE THAT CANDLES ARE BURNT CORRECTLY AND IN SAFE SURROUNDINGS. NEVER LEAVE BURNING CANDLES UNSUPERVISED**

This simple and successful oil filled alternative to wax candles has proved useful for churches where draughts are a problem. They are also very suitable as Acolyte candles. These can all be shouldered to fit the internal dimensions of existing sockets. Other sizes available on application. Used in conjunction with Charles Farris Ltd Church Candle Oil, the fibre wick inside each of these candles does not need trimming or replacing and the burning is virtually smoke free. Please contact customer service for further information.

## GUIDELINES FOR BURNING PYLON OIL CANDLES

### WICK ADJUSTMENT

When first installing oil filled candles, unscrew the wick assembly and adjust the wick height manually to approximately 1/8" high, this will produce a normal flame height. Care should be taken NOT to pull the wick down below the metal tube, as retrieval can be difficult.

### FILLING THE CANDLE

While the wick assembly is removed, fill the candle with oil to the base of the internal thread - approx 3/4 full. The oil, when warm, expands and if overfilled will leak through the air holes in the top. To judge the height, many customers have put a small piece of cork in the reservoir and are then able to assess the oil depth as the cork rises.

**OIL** The Charles Farris oil has been specially developed to give a safe and clean burn. Other oils, i.e. barbecue fluid will result in black deposits on the candle and may ignite at a lower temperature increasing the fire risk.

### LIGHTING THE CANDLE

When the reservoir is filled and the wick assembly has been replaced, allow a few minutes for the oil to reach the wick. The wick is fibreglass and the oil is transmitted by capillary action so the oil vapour, not the wick burns. This means that once the flame height is set the wick will not need trimming. Care must be taken NOT to use wax tapers to light the candle as the wax can block the wick. Should this occur, pull up the wick cut a 1/4" off and re-light. Tall altar candles can be lit by using a nylon lighter. At other times a lighter or match can be used. Nylon candles can be extinguished in the normal way or by using a CLEAN extinguisher.

**CLEANING** Should the candle become dirty then the oil applied with a cloth will remove dirt and dust. Do not clean with soap and water. These simple guidelines, if followed, should result in your nylon candles giving good service for a long time.

- 1.2 The Conditions apply to all contracts entered into by the Seller whether entered into via this website or otherwise. No modification or variation of any of the Conditions shall be binding unless executed in writing by the parties.
- 1.3 The Conditions contain the entire terms and conditions of the contract between the Seller and you and (subject to any rule of law incapable of being over-ridden) operate to displace any rule of law and terms and conditions imposed or sought to be imposed by you which might otherwise apply.

- 2.2 If goods are to be personalised by the Seller in accordance with a specification or specific request submitted by you, you shall indemnify the Seller against all loss, damages, costs and expenses awarded against or incurred by the Seller in connection with or paid or agreed to be paid by the Seller arising from any claim for infringement of any patent, copyright, design, trade mark or other intellectual property rights of any other person which results directly or indirectly from the Seller's use of your specification.
- 2.3 The Seller reserves the right to make any changes in the specification of goods which are required to conform with any applicable statutory or EC requirements.

## 4 DELIVERY

- 4.1 Delivery is usually within 7 Working Days from receipt by the Seller of your order. Please advise us if goods have not been received within 21 Working Days from the date of ordering. Despatch can occasionally be delayed, particularly prior to Christmas and Easter, when goods are being made to order, or when popularity depletes stocks of some items. Goods required urgently should be notified at the time of ordering.
- 4.2 Whilst delivery dates are given by the Seller in good faith based upon information available to the Seller, such dates are not guaranteed and the Seller accepts no liability for delay in delivery howsoever caused and no delay of 30 days or less from the date of your order shall entitle you to reject any such delivery or any further instalments or part of the order or to repudiate the contract or the order or any part thereof or to claim any damages or compensation in respect of any such delay.
- 4.3 Any shortage of delivery or faulty goods must be notified to the Seller in writing within 7 Working Days of delivery of the goods.
- 4.4 If the Seller fails to deliver the goods for any reason other than any cause beyond the Seller's reasonable control or your default, and the Seller is accordingly liable to you, the Seller's liability shall be limited to the excess (if any) of the cost to you (in the cheapest available market) of similar goods to replace those not delivered over the price of the goods.
- 4.5 You have the right to return the goods within 7 Working Days from the date of delivery by giving us notice of your wish to do so. If you decide to return the goods, then you do so at your own expense (unless the goods delivered were substitutes for the goods which you ordered) and it shall be your responsibility to ensure that the goods are received by the Seller and are not damaged in transit. The Seller will refund the price of the goods to you within 30 days of receipt by the Seller of your notice that you wish to return the goods provided the goods have been returned to the Seller. Accordingly, you must retain possession of the goods and take reasonable care of them whilst they are in your possession, in any event for seven Working Days from delivery and, if you give us notice that you wish to return the goods, until you deliver the goods to the Seller. This right does not apply if the goods were made or personalised to your specification.
